

Coming in December 2020 a new global report on WASH in health care facilities (HCF)

FOCUS

- Country progress against the WHA 2019 resolution
- New JMP data & analysis on access to WASH in HCF
- Analysis of bottlenecks, success & opportunities for embedding WASH within health efforts
- Recommendations for what specific groups/actors can do including those from the climate, human rights and gender equity communities & investment banks
- WASH as a social justice & rights-based issue needing urgent attention & action

CONTENT

1. Recap on the global vision, targets and metrics
2. Latest status of WASH services in health care facilities (JMP)
3. Showcase regional and country initiatives and progress and highlight the interlinked health programmes and issues that influence and are influenced by the current WASH situation
4. Regroup on the need to build a movement and strengthen advocacy & investment
5. Conclusion - a renewed and powerful/strong statement on WASH contributions to resilient health systems and a strong call to concrete actions and accountability mechanism for policy makers and others. A short roadmap for achieving the progressive global targets will be included.

This report presents partners & the WASH community with a chance to strengthen collaboration, build on existing momentum & accelerate action & investment so that we can achieve our vision, goals & targets

WHAT CAN YOU DO AS A KEY SUPPORTER OF WASH IN HCF?

1. Help us develop a powerful report, so that we maximise it's impact and potential to drive future action – **comment on the draft.**
2. Think and take action: how will you & your organisation **respond and take action?**
3. Mark the date. 14 December. Let your comms teams know. **Work with us to publicize the report & its value across all channels.**

From Resolution to Revolution – we all play a part.
